The 8th grade class participated in the Architectural Awareness program this year. We worked with Luka Vlastic from Hunt Engineering who visited our classroom to talk about what an architect's job entails. For this year's location, the students chose the previously operating Paramount Bowling Lanes that closed a couple of years ago and has been sitting empty since then. Faith, Lilyanne, Josh, Noah and Ian chose to repurpose that facility as Miracle Mile Entertainment Center. This would be a family friendly indoor/outdoor mini golf and go kart track and would have an arcade and restaurant as well. Our class traveled to the site and made measurements of the outside of the existing building. We used those measurements to create a scale drawing and then designed a model of the repurposed event center. The 8th graders also created a Powerpoint that they presented in the CMOG auditorium to an audience of parents and students from other area schools. They were quite nervous, but did a great job!
